How to solve it

1. **Desmond:** "Guess what! He was in the 5th row, in the 5th column." That can only mean column 5, row 5: the **Slide Tower**.
2. **Alison:** "Guess what! She was in the Sandbox, on a spring rider." With the others in place, the only cell left for her is column 6, row 2, the **Sandbox**.
3. **Noah:** "He was in the Seesaw Spot, and on a spring rider!" With the others in place, the only cell left for him is column 2, row 4, the **Seesaw Spot**.
4. **Hiram:** "He was in the Picnic Corner, and in the 3rd column!" With the others in place, the only cell left for him is column 3, row 3, the **Picnic Corner**.
5. **Ronald:** "He was 5 squares from the swing, counting the difference in rows plus the difference in columns." With the others in place, the only cell left for him is column 1, row 6, the **Seesaw Spot**.
6. **Whiskers:** "The lost kitten! Only one friend discovered his hiding spot." With the others in place, the only cell left for him is column 4, row 1, the **Sandbox**.
7. With everyone placed, only **Alison** shares the **Sandbox** with **Whiskers**, **Alison** is the answer.
