The Lost Pirate Treasure

Something has gone wrong on the pirate island. The Lost Pirate Treasure has disappeared from its secret hiding place, and nobody knows where it is now. The island is still full of sunny beaches, tall palm trees, and winding paths, but something feels missing. The treasure was more than a chest of shiny things. It helped the islanders trade, repair their boats, and keep their little island running smoothly.

Somewhere beyond the familiar coves, the Lost Pirate Treasure is waiting to be found. It does not know if anyone is coming to look for it. News of the missing treasure reaches our young hero, but the grown-ups shake their heads. The island is too tricky to cross, they say. They have maps, but some of the maps are old. They have boats, but nobody wants to sail into those mysterious coves. So our young hero decides that someone has to go.

Of course, our young hero will not go alone. A cheerful little parrot named Captain Crumbs comes along for the journey. Captain Crumbs has one very funny habit. Whenever he gets excited, he tries to say, "Aha!" but usually says, "Aaa-ha-choo!" instead. He also believes every shiny pebble is a treasure, so someone may need to keep an eye on his pockets.

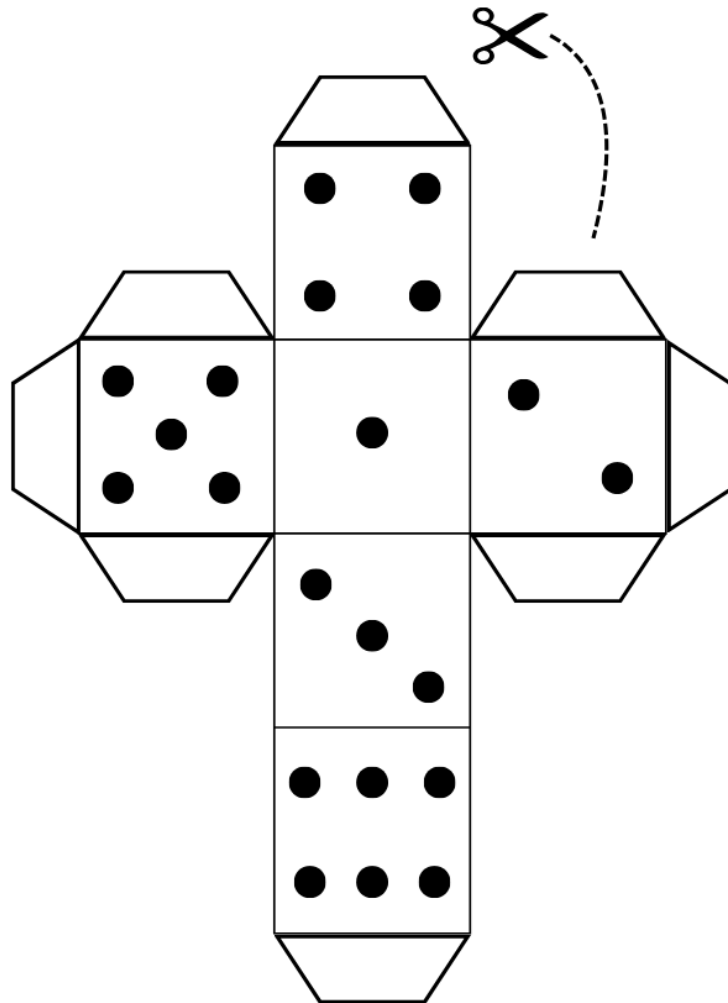

Before setting off, our young hero learns what is known about the journey. The path ahead has 18 stages, and a question waits at each one. The pirate island is not easy to cross. There are hidden coves, twisty paths, rocky shores, thick palm trees, and places where an old pirate map can be more confusing than helpful. Nobody knows exactly what waits beyond each bend.

There is one comforting rule to remember. If a question is answered incorrectly, it costs a step and nothing more. There is no scary punishment and no reason to give up. The only way to lose is to stop. So our young hero takes a deep breath, checks the map, and looks toward the island beyond the shore.

With Captain Crumbs perched nearby and the old map tucked safely away, our young hero steps through the gate and begins the search.

- 1 Each player picks a token and places it on the START space.
- 2 On your turn, roll the die and go forward that many spaces.
- 3 Land on a space with a star and you take the top card from the mission pile. Land anywhere else and your turn simply ends.
- 4 Answer the question. Get it right and you stay where you are.
- 5 Get it wrong and you go back one space. Going backwards never costs you a question: if you land on a star that way, you do not draw a card.
- 6 Put the mission card at the bottom of the mission pile.
- 7 The first player to reach the FINISH space wins the hero card.

What to prepare: the cut-out die, 90 mission cards shuffled into one pile, 1 hero card and one token for each player.

1. Cut around the outside of the whole shape, tabs included.
2. Fold along every inside line, so the six faces turn inwards.
3. Glue the tabs under the neighbouring face and hold until dry.
4. One die is enough for the whole table - roll and move that many spaces.

Each player gets two tokens – one to use and one spare. Glue them onto thick card and cut around the circle so they stand up on the map.

Even better: use a small toy figure to mark where you are. Anything that stands on one space will do – a mini figure, a button, a bead or a coin.

For whoever is running the game. Take these last sheets off the back of the stack and keep them. The mission cards themselves do not show the answers.

Tip: for Life skills questions, there is not always one right answer – listen to what your child says and ask them to explain their thinking. It is a good way to see things from their point of view.
